

ZUZA's Recommended PDF Export Preset for Adobe® Creative Suite®

This guide provides simple step-by-step instructions for importing ZUZA's recommended PDF Export Preset and PDF creation from any Adobe Creative Suite application.

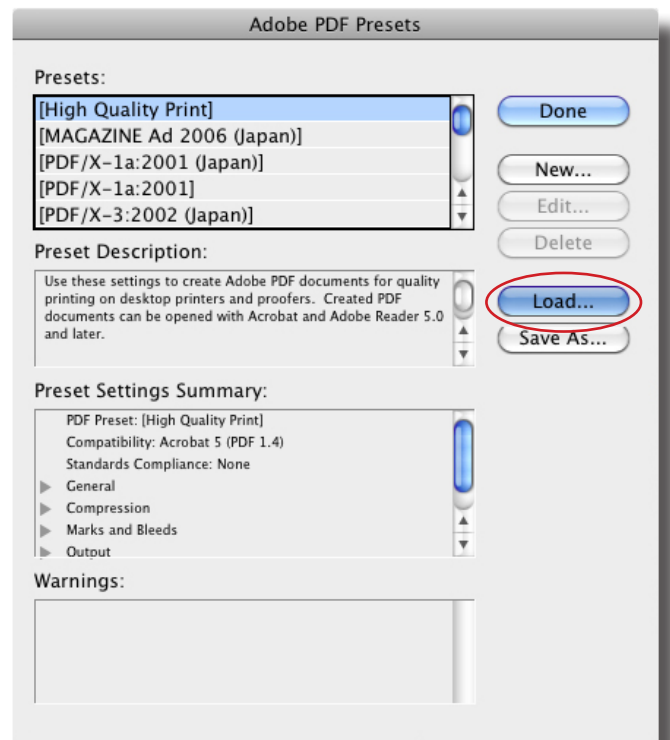

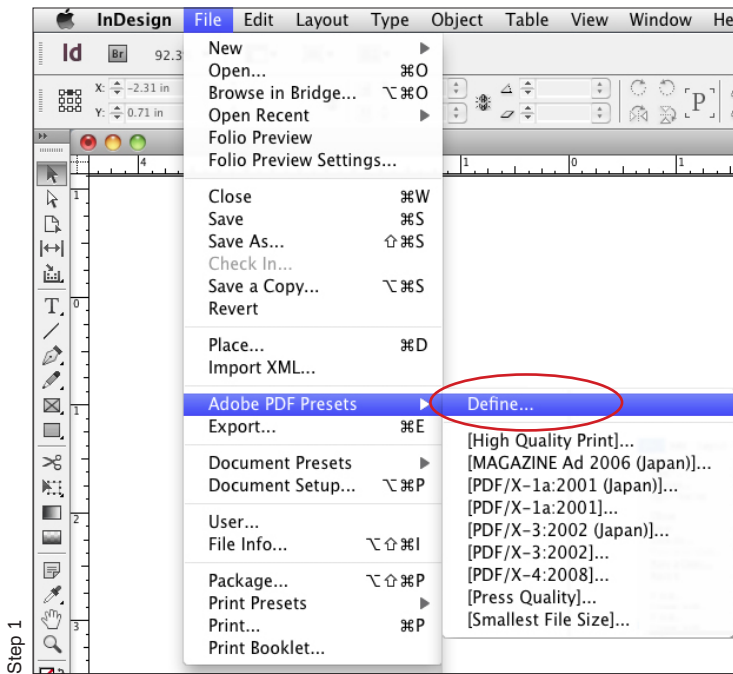

The following instructions are illustrated using InDesign, but the steps are very similar for all the Creative Suite products.

Once you import the PDF Export Preset into one of the Creative Suite applications, it will automatically available to all the applications.

Please feel free to contact us with any questions or concerns.

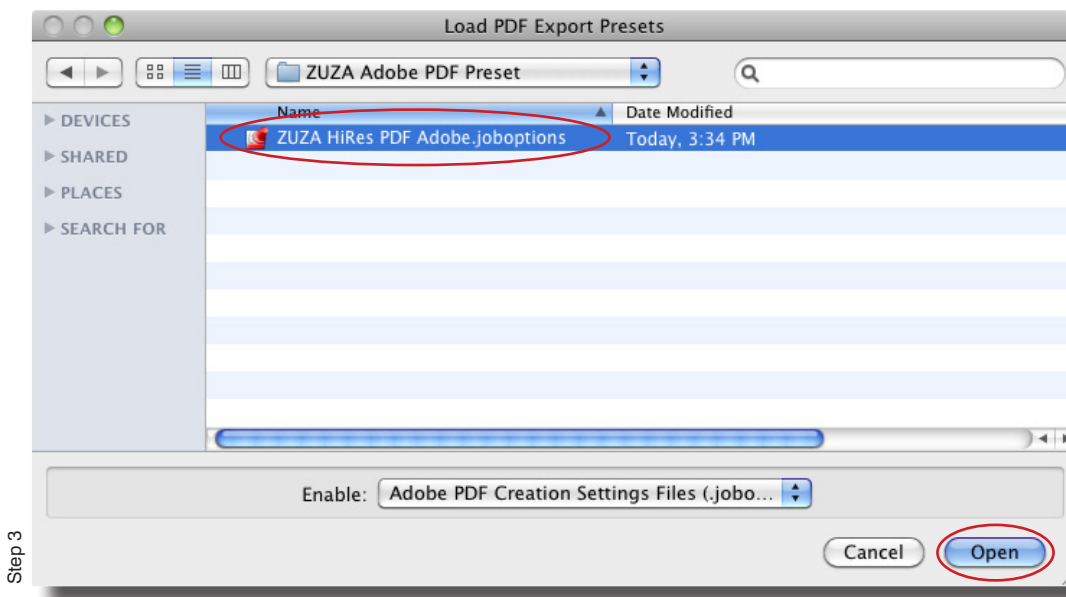

Importing ZUZA's Recommended PDF Export Preset for Adobe® Creative Suite®

Launch InDesign and go to “File” > “Adobe PDF Presets” > “Define...”.

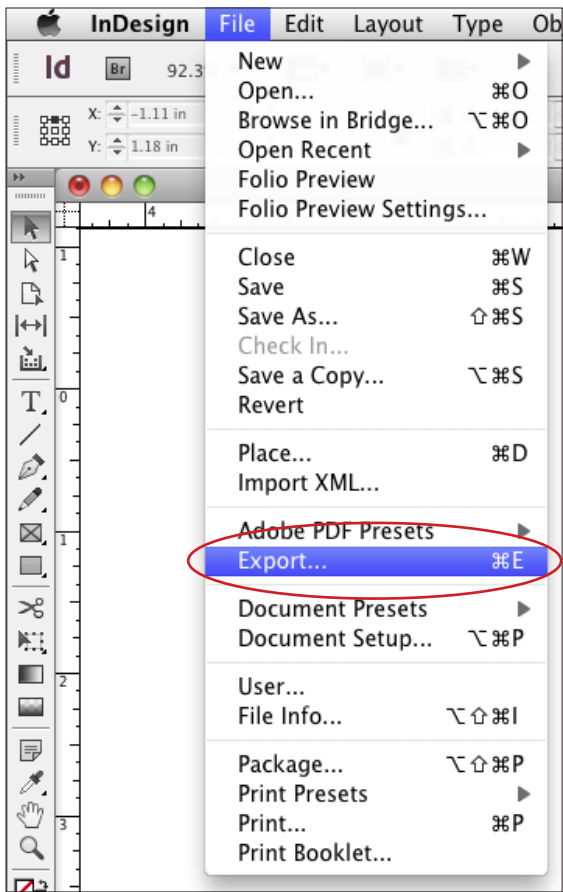

In the “Adobe PDF Presets” dialog box, select the **Load** button and navigate to where you saved the provided “job options” file.

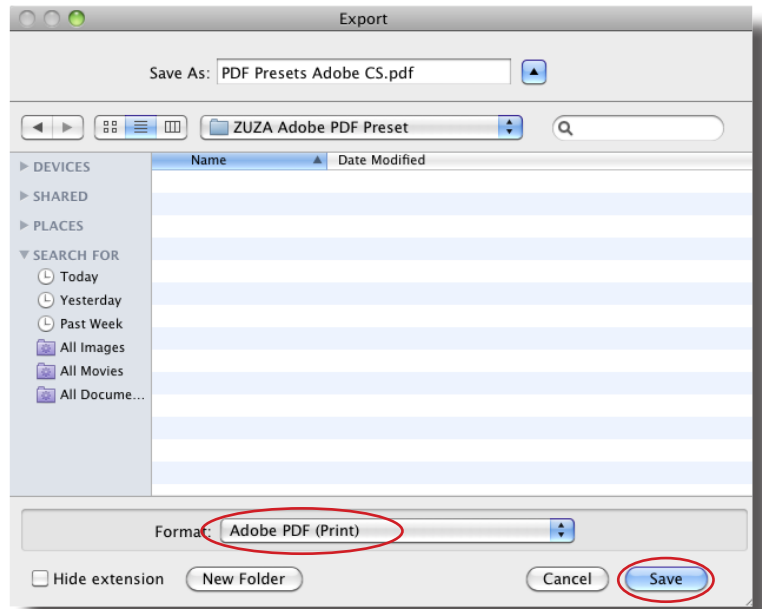

Select the job option and select **Open**.

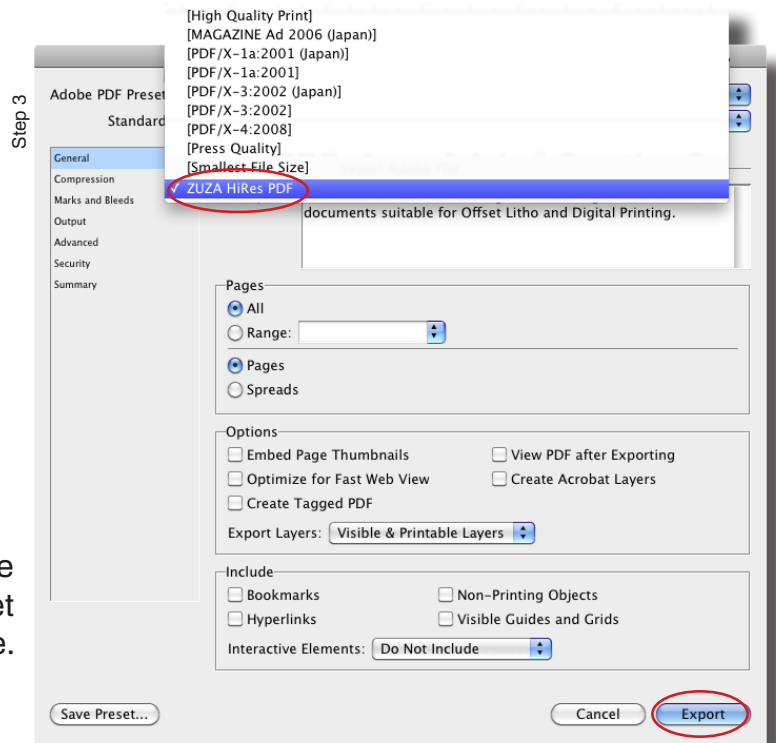

Exporting PDFs from Adobe® Creative Suite® using ZUZA's Recommended PDF Export Preset

When you're ready to export your PDF file(s) from InDesign, go to "File" > "Export..."

In the "Export" dialog box, select the **Adobe PDF** format from the pop-up button towards the bottom of the box.

Select the appropriate Adobe PDF Preset and export your file.
